

Experiencing a Life Journey

Social Work works with service users from all walks of life. In order to sensitize students' understanding of the changes of different stages of life, be more empathetic and reflective to people who are different from them, all Full-time Year 1 students of Associate of Social Science in Social Work visited the Jockey Club Life Journey Center in February and April 2017 accompanying by three social work teachers.

Our students experienced the process of ageing through multi-media exhibits, demonstrations and interactive games. Students were inspired by going through the interactive "time tunnel". The life journey experience gave students meaning messages: Treasuring our lifetime and respecting the elderly.
